## ABOUT ME

I am a student currently majoring in Computer Science at the University of Arkansas. I have a background in simple server management and web design.

## SKILLS

## EDUCATION

2018 - Current **Computer Science BS**  
University of Arkansas, Fayetteville, Arkansas

2014 - 2018 **High School**  
Lincoln-Way East, Frankfort, Illinois

## EXPERIENCE

Mar. 2019 **4th place in Hackathon** **ACM Spring Hackathon (Sponsored by J.B. Hunt)**  
My team placed fourth out of nineteen at the Spring 2019 Hackathon. Our project used serial output from arduinos to update a web server in real time. This was used to show the percentage of load in trucks inexpensively. The team was comprised mostly of freshman, and the source code can be found on my github in the spinghackathon2019 repo.  
Node.js / C / HTML / CSS

2016 - Current **Library Shelver** **Frankfort Public Library**  
As a library shelver, I am responsible for shelving books, assisting patrons, as well as helping set up and clean after events. Because I am one of the most senior library shelvers, I am also responsible for training new hires. I have trained all of the shelvers currently working in the library today.

## AWARDS

Jan. 2018 **Eagle Scout with three palms** **Frankfort Troop 270**  
I am an Eagle Scout and have been active in the program since first grade. My Eagle Project was to build a Gaga Ball pit for our local park district. This involved weeks of planning, fundraising, and prep work to complete. The construction itself took three days and I led about 20 other Scouts in total during the process.

## LANGUAGES

**English** - Native  
**German** - Intermediate (3 Years)

## CLUBS

**ACM** - 2 Semesters  
**Game Club** - 2 Semesters

## SOURCE

This entire resume is written using LaTeX and is completely open source. All source code is hosted on my Github in the resume repo.
